

# Safe and Sound

5 Points is more than a collection of bars, shops, and restaurants. It's a community. A community consisting of a multitude individuals dedicated to bringing fun and excitement to those who visit it. We who work and live within the community are like family, and the people who explore the shops, eat at the restaurants, and adults who stay for the night life are our friends and often become like family themselves. When tragedy strikes it is imperative that we not only come together as a community to grieve and mourn, but also enact meaningful change . Our goal is to provide the best experience possible, and make this community a safer place for all within it. We must respond to tragedy not only with thoughts and prayers, but honor those affected most with our efforts to create meaningful changes to improve our service and the customer's experience. We are a family and just as any family would, we want make sure everyone makes it home safe and sound.

## Safe and Sound Pledge

This business, in conjunction with the previously established security protocols, pledges that for the first hour after closing all available door staff will be outside on the sidewalks offering to escort concerned patrons to their ride, whether it be their personal vehicle, Uber, or Lyft. We will walk you to your car, we will wait with you for your Uber or Lyft, and verify that the driver is the operator provided by the ride-share service.
